DETAILED ACTION

This action is responsive to the amendment filed 03-28-2007, which has been entered.

Claims 1-28 are allowed.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: the prior art fails to anticipate or render obvious the combination of a bicycle derailleur as set forth in claims 1, 2 and 16, and most significantly requires the projection disposed further from the rotation axis than the recess and a center plane perpendicular to the axis of rotation, wherein projection having a free edge located furthest from the center plane and the free edge lying in an offset plane parallel to the center plane set forth in claim 1. Claims 2 and 16 further require, an annular, cup-shaped dust cap mounted axially between the inner guide plate and the tension pulley about said rotation axis, wherein inner guide plate having a guide section with a radially outermost edge of the guide section located radially inwardly of the projection and radially outwardly of the annular portion of the dust cap. Particularly, claim 2 requires the radially outermost edge of the guide section to be located in an annular recess of the pulley, wherein the projection projects in an axial direction further from a center plane of the tension pulley than the outermost edge of the guide section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
